

Sprint period

The sprint period spanned weeks number 17, 18 and 19. More specifically starting the 20th of April and lasting until May 6th.

Goals

Due to having several other exams during the sprint period we do not expect to get much work done.

Work distribution

Daniel will do some work to the backend.

Anders will do some work to the frontend.

Accomplishments

We managed to add some more swagger and java doc to the backend and started making tests on postman.

Not a lot was accomplished since we were focused on other exams.
